

Alex Morgan

Python Backend Developer

Email: alex.morgan@example.com | Phone: +1 (555) 234-5678 | LinkedIn: linkedin.com/in/alexmorgan | GitHub: github.com/alexmorgan

PROFESSIONAL SUMMARY

Results-oriented Python Developer with 3 years of experience architecting high-throughput REST APIs and asynchronous microservices. Proficient in Django, FastAPI, PostgreSQL, Docker, and Redis caching.

TECHNICAL & PROFESSIONAL SKILLS

Languages: Python, SQL, JavaScript, Bash

Frameworks & Backend: Django, Flask, FastAPI, REST API, Microservices

Databases & Caching: PostgreSQL, Redis, SQLite

DevOps & Tools: Docker, Git, GitHub, Linux, PyTest, Postman, AWS

Soft Skills: Agile, Problem Solving, Teamwork, Communication

WORK EXPERIENCE

Python Backend Engineer | Nexus Cloud Solutions (2023 - Present)

- Engineered resilient RESTful APIs in Django and FastAPI serving over 150,000 daily active requests.
- Optimized complex PostgreSQL database queries and integrated Redis caching, reducing API latency by 42%.
- Containerized applications using Docker and established CI/CD automated test pipelines with GitHub Actions.

Junior Software Developer | ByteWave Tech (2021 - 2023)

- Developed backend logic in Flask for an enterprise billing portal.
- Collaborated in a fast-paced Agile Scrum squad delivering bi-weekly feature sprints.

KEY PROJECTS

Scalable E-Commerce Inventory Microservice (FastAPI, PostgreSQL, Docker, Redis)

- Constructed an event-driven inventory management microservice handling concurrent stock updates.
- Implemented JWT token-based authentication and comprehensive unit tests with PyTest.

EDUCATION

B.Tech in Computer Science and Engineering - State Institute of Technology (2021)

CERTIFICATIONS & BADGES

- AWS Certified Cloud Practitioner
- HackerRank Gold Badge (Python)
